climbing hydrangea	<i>Hydrangea petiolaris</i> . . . . . #1/qt \$15
🌿 wisteria	<i>Wisteria frutescens</i> 'Amethyst Falls' . . . . . #5 \$75

## How to plant a shrub ...

Plant top of root ball 1-2" above surround grade. Add a 2-4" layer of mulch. Do not bury stems or trunk.

Loosen outer roots after removing from container.

Backfill with existing soil. If amending soil add no more than 50% compost to prevent hardpan barrier. Water in thoroughly to eliminate air pockets.

Grade. Break down sides of the hole when backfilling.

Leave soil under root ball undisturbed to reduce settling.

Width of hole should be 3 times root ball diameter.

Espoma Bio-tone Starter Plus can be added when planting.
